

ReGIS

Most hotel marketers are beginning to understand that an effective online reservation program does not have to depend on an internet mega broker where you will compete side by side with hundreds of other properties and be forced to compromise your rates. POWERi Technologies has developed an effective online reservation system that can be easily integrated into your hotel's website.

Included Features:

- Completely web-based - No software needed
- Inventory management capability
- Detailed and global rate management
- Automated e-mail confirmations
- Property specific branding
- Seamless integration to existing websites

Benefits:

- Available to your customers 24 / 7
- Builds eMail database for future marketing
- Easy access to real-time reporting
- Complete control of rates and inventory
- No 3rd party commissions = Increased profit Margins

Also Available:

- Integration with existing property management systems
- e-Commerce solutions for on-line credit card processing

With our online reservation and booking system, your online room rates are within your full control 24 hours a day, seven days a week. And when you start generating reservations directly from your website in the middle of the night, you'll realize how powerful a tool this is.
